☎ 7989038692
📍 13-1-99/m, Rotary-nagar, Palasa-kasubiggs town, Srikakulam (Dist.), Pin: 532221.

SKILLS

SAP HANA Cloud (Proficient in using SAP HANA Studio, SAP Analytics Cloud, real-time analytics, and visualization. Ex: Creating Tables, Calculation views, Procedures, Table Functions, Flowgraphs, Hierarchies, Analytic privileges, CDS artifacts, Security and authorizations)

HTML & CSS

Java programming & SQL

Proficient in working within Safe Agile methodology and familiar with DevOps tools like Bitbucket, Jenkins, and Git for version control and continuous integration (CI/CD). Comfortable using Business Application Studio (BAS) for development tasks

PROJECTS

Design of microstrip Patch Antenna for 5G communication using HFSS Software

Design a 5G microstrip Patch Antenna with definite specifications such as frequency range, antenna type, polarization and desired gain in HFSS Software, and set up accurate meshing for the simulation to run simulation for analyze parameters like impedance matching, bandwidth and radiation efficiency.

Communication Through Laser Beam for limited distance

Enabling communication through Laser Beam for limited distance involves the transmission of data(audio) using modulation (Amplitude modulation) Laser signals. This technology, often used in free space optical communication, offers high data rates and security. However, it's suitable for relatively short distance due to atmospheric interference and beam diversion.

Bluetooth connected RC Bot Using Arduino

A Bluetooth-controlled robot using Arduino utilizes Bluetooth communication to receive commands wireless from a mobile device. By integration an Arduino board with motor controllers, sensor and Bluetooth modules user can remotely control the robot's movements and actions

ACHIEVEMENTS & AWARDS

Achieved 1st position in line following Bot-race in 2022

Achieved 2nd position in bluetooth connected RC Bot-race 2020

HOBBIES

Gardening

Drawing

Listening to music
